

# MULTI SPLIT SYSTEMS

A multi-split air conditioner features up to five air outlets connected to a single compressor.

This type of system allows for the installation of multiple units that can be mounted on walls, floors, or ceilings, offering greater flexibility and the option to cool or heat multiple rooms simultaneously.

# FLOOR STANDING

These units are designed to fit smoothly into modern interiors and distribute warm and cool air efficiently throughout the room, thanks to their compact size and sleek design.

# WALL MOUNTED

Wall-mounted AC units offer efficient and space-saving cooling solutions, providing targeted comfort while complementing interior decor. Multiple colour options available.

Four Colour Options

# DUCTED

Enjoy all the advantages of innovative climate control for any interior without any intrusion, as our units can be discreetly installed in your loft or false ceilings.
